The Judo Twins is a compelling book that will capture both the hearts and minds of readers. It's the true story of twin brothers who were given up by their dysfunctional parents as infants and sent to orphanages where they would spend their entire childhood. Yet, they grew up to become world class athletes in the noble sport of judo and became known the world over as the Judo Twins! The reader will meet some of the world's best judo athletes who will explain why judo has had such a profound impact on their lives. If you love a good human interest story and the martial arts, this book is for you!
